

Course: OPPM – Design & Configuration

Duration: 2 Day

Cost: £775

Course Delivery: Classroom / In-House

Who Should Attend: Portfolio Management (PFM)

Prerequisite(s): Knowledge of PPM principles and practices

Course Overview

Learn About

- Idea collection and business case development
- Portfolio prioritisation and selection models (composite models)
- Strategic Alignment
- Financial Model construction and development (relative)
- Governance Models
- Benefits Realisation

Benefits

This course will help you understand the basic features and functions of Oracle Primavera Portfolio Management (OPPM) so that you can apply them to your organisation's PFM processes. It will enable you to maintain your own organisations or customers implementation if you are another Oracle partner.

Course Objectives

You will gain a high level overview and be able to work with Oracle's Primavera Portfolio Management (OPPM) solution.

The course will vary depending on your organisation's PPM implementation for portfolio management, and therefore we would welcome a call so we can discuss the learning objectives that are specific to your needs.

Course Topics

You will gain a high level overview and be able to work with Oracle's Primavera Portfolio Management (OPPM) solution.
